QUICK INSTALLATION:

Installing the Order Forms:

- Copy all the files and folders in the into your DOCUMENT ROOT directory which is /var/www/html/ or /home/<yourdomain.com>/public_html/.
- Change the **SITE_PATH** in the **config.inc** file located in the **DOCUMENT ROOT** to match your website's URL.
  Eg: http://www.yourdomain.com
  > **To**
  http://www.smartyhost.com.au
- Change the settings in the **settings.inc** file inside the **lib/clientcode/** folder which is in the DOCUMENT ROOT as well. Also, change the **RESELLER_USERNAME** and **RESELLER_PASSWORD** with the details provided to you.
- Change the permissions of the **tpl/** and **compile/** folders located in the DOCUMENT ROOT to 777 (Eg. chmod 777 tpl/).
- Change the value of the "**sitePath**" variable in the first line of the "function.js" file in the DOCUMENT ROOT to match your website's URL.

Installing the Domain Management Control Panel:

- All the steps mentioned in the above section to be completed before proceeding.
- Change the **SITE_PATH** in the **config.inc** file located in the **DOCUMENT ROOT/customer** to match your website's URL. Also, change the **RESELLER_USERNAME** and **RESELLER_PASSWORD** with the details provided to you.
  Eg: https://www.yourwebsite.com.au/customer
  > **To**
  https://www.smartyhost.com.au/customer
- Change the permissions of the **tpl/** and **compile/** folders located in the **DOCUMENT ROOT/customer** to 777 (Eg. chmod 777 tpl/).
- Rename your logo as **smhost_logo.gif** (GIF file) and upload it into the **DOCUMENT ROOT/customer/images/** directory.

Using Dreamweaver to edit the HTML Templates:
- The HTML template files can be customized to match your website appearance are located in the **tpl/** directories.
- The HTML template files have an extension as ".tpl".
- Please don't rename the files.
- Please follow the instructions in this URL before you edit the template files with Macromedia Dreamweaver.
